

## SmartKing™ power converter

### CHARACTERISTICS

- Compact powerdown convertor
- Plastic housing
- Screw terminals
- Input AC or DC 16V to 28V
- Output 12Vdc 500mA
- Indoor use

### DESCRIPTION

In many apartment situations with an existing audio or video system , the electric lock is directly powered from that system. Mixing an AC electric lock with an access control system that uses a universal 12Vdc supply, can be problematic. In those cases AC power supply and AC electric lock need to be replaced. This power convertor will solve this issue by taking in any DC or AC voltage between 16 to 28V and will output a 12Vdc voltage , up to 500mA.

### TECHNICAL SPECIFICATIONS

- Input voltage: AC or DC 16-28
- Output voltage: DC 12V, 500mA
- Operating temperature: -10°C ~ +55°C
- Dimensions: 73 x 40 x 23mm

### ORDER INFORMATION

- AC213900 - SmartKing™ power converter
