

# AC213900 Power Converter

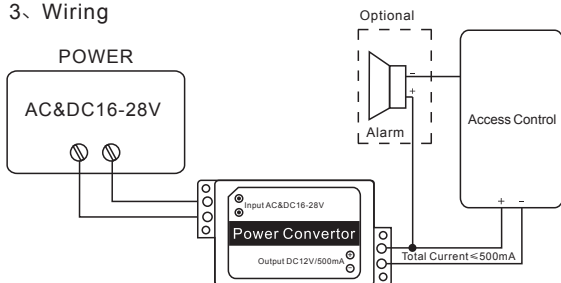

## 1、 Function Introduction

- (1) Power input: AC&DC 16~28V;  
Power output: DC 12V/500mA
- (2) When the input power lower than AC 16V, please insert the short circuit plug "J3" into "L". It is just for converting AC to DC, the voltage is the same.

## 2、 Installation

- (1) Put the power converter box on the wall and mark the hole positions.
- (2) Drill the holes, and put the rubber bungs in.
- (3) Fix the screws on the wall.

## 3、 Wiring

## 4、 Packing List

Name	Quantity	Remark
Power Converter	1	
User Manual	1	
Screw Driver	1	
Rubber Bungs	2	Φ6mm X 28mm
Self Tapping Screws	2	PM 3 X 25mm
